

FABIO EVERTON

AGENTIC WORKFLOW & AUTOMATION ANALYST | SENIOR PROJECT OPERATIONS LEAD

📍 Brasília, DF, Brazil | ✉️ Fabio_Everton@proton.me | ☎️ +55 61 98407-6881 | 🔗 linkedin.com/in/fabio-everton | 📁 github.com/fabioeverton

PROFESSIONAL SUMMARY

Senior Project Operations and Governance professional with 16+ years of experience managing complex, high-stakes infrastructure delivery and turnkey operations. Currently transitioning core process-governance expertise into the digital space, specializing in **AI-driven workflow automation and Agentic Systems Orchestration**. Proven capability in designing logical system flows, managing cross-functional technical teams, and ensuring strict compliance with regulatory standards. Developed the BRACHÁT ecosystem—an advanced, event-driven agentic framework utilizing LLMs, automated WhatsApp API integration, task queues, and containerization. Strong background in Legal Operations (Law/Notarial Sciences), providing a unique advantage in AI compliance, LGPD, and operational risk mitigation.

CORE COMPETENCIES & TECH STACK

AI & Automation: AI Agent Orchestration, Agentic Workflows, Prompt Engineering, Rapid Prototyping, API Integration, Task Queue Management.	Technology & Infrastructure: Python (Foundational / Automation), Docker (Containerization), Google Cloud Platform (GCP Foundations), SQL/PostgreSQL, Git/GitHub.
Operations & Governance: Project Operations Management, EPC/Turnkey Delivery, Process Mapping & Optimization, Risk Management, Budgeting & Cost Control, Vendor Management.	Compliance & Legal: Legal Operations (LegalOps), Regulatory Compliance, Contractual Control, LGPD / GDPR Data Privacy Frameworks.

PROFESSIONAL EXPERIENCE

AI-Enabled Operations & Agentic Workflows Developer <i>Independent Project Ecosystem</i>	Dec 2024 – Present <i>Remote</i>
Architected and developed the BRACHÁT ecosystem, an automated operations environment orchestrated by autonomous AI agents (Hermes & Ezra) for workflow execution.	
- Designed event-driven workflow automation scripts in Python to handle task queuing, system state monitoring, and process orchestration. - Integrated Puppeteer/Chromium setups to automate real-time communication flows via WhatsApp Business APIs, optimizing response latency and queue processing. - Configured local containerized environments using Docker to isolate agent operations, ensuring portability and secure execution. - Applied project governance principles to digital workflows, implementing compliance checks, logging mechanisms, and process validation steps.	
Featured Repository: brachat-main (github.com/fabioeverton/brachat-main) An open-source, event-driven agentic framework built to automate business operations and client interactions. Handles real-time messaging, cognitive agent validation, and async task queuing.	

Founder Senior Project Operations & Infrastructure Delivery Lead <i>Agregata Construções</i>	2008 – 2024 <i>Brazil</i>
Founded and operated a turnkey project management and construction delivery firm, successfully executing over 60 high-complexity commercial corporate office developments.	

- Managed the full project lifecycle (planning, execution control, resource allocation, and technical handover) under strict constraints of scope, budget, and time.
- Coordinated multidisciplinary technical teams on-site, including civil work, electrical installations, HVAC/MEP, and IT/networking infrastructure setups.
- Negotiated contracts and managed SLAs for hundreds of suppliers and sub-contractors, ensuring quality assurance and operational readiness.
- Governed technical and administrative compliance workflows, interfacing with municipal and regulatory agencies to secure all required legal documentation.

Operations & Compliance Analyst

2007

Banco do Brasil

Brazil

- Executed high-volume document validation and compliance analysis in a heavily regulated financial backoffice environment.
- Monitored and validated client and transactional data integrity, ensuring compliance with banking regulations.
- Supported internal audit processes by maintaining clean, structured operational logs and documentation.

EDUCATION

Uniprocessus

2021 – 2024

Bachelor's Degree – Legal Operations & Notarial Sciences (Completed Coursework)

Centro Universitário Processus (UniProcessus)

2021 – 2023

Law (Juridical Sciences - 8 Semesters Completed)
