ML SOLUTIONS ARCHITECT -- AI & DATA PLATFORMS

PROFESSIONAL SUMMARY

Solutions Architect with 16+ years bridging technical delivery and enterprise client relationships. Architected production-grade AI/ML systems including multi-agent LLM orchestration platforms, RAG pipelines, and governance-by-design frameworks. Hands-on experience with Python, FastAPI, LangChain, PostgreSQL, Docker, and cloud infrastructure. Proven track record designing customer-facing solutions for B2B enterprise clients, managing R\$30M+ in project portfolios, and leading cross-functional engineering teams. Legal Operations background provides structured approach to compliance, risk, and enterprise governance.

CORE TECHNICAL SKILLS

Languages: Python, SQL, JavaScript, TypeScript | AI/ML: Claude API, OpenAI, LangChain, RAG (pgvector), Agentic Workflows, Multi-Agent Orchestration, Prompt Engineering | Data: PostgreSQL, Redis, Kafka, MySQL | Cloud & DevOps: Docker, GCP, CI/CD, Git | Enterprise: Snowflake, Salesforce, Oracle, SAP | Architecture: Distributed Systems, API Design, Microservices, Event-Driven Architecture | Governance: OPA/Rego, Policy-as-Code, SHA-256 Audit Chains, Multi-Tenant Security

EXPERIENCE HIGHLIGHTS

- Architected multi-agent orchestration system with 22 specialized LLM agents running deterministic workflows via LangChain -
- Built full-stack AI Governance platform (Fellow Governance) with immutable SHA-256 audit chains, multi-tenant row-level sec
- Deployed production AI systems on Docker/GCP with automated CI/CD, serving enterprise B2B clients
- Designed circuit breaker pattern with automatic model fallback, token budget tracking, and prompt injection defense for produ
- Managed R\$30M+ in enterprise project portfolios as primary client-facing technical lead for 60+ B2B projects
- Led cross-functional teams of 20+ professionals across engineering, IT, compliance, and operations
- Built vendor management strategies that reduced delivery timelines by 20%

EDUCATION & CERTIFICATIONS

Bachelor - Legal Operations & Notarial Sciences | UniProcessus (2021-2024)
Law (Juridical Sciences - 8 semesters) | UniProcessus (2021-2023)
Building with the Claude API - Anthropic (2026)
AI Capabilities and Limitations - Anthropic (2026)
Google Cloud Fundamentals: Core Infrastructure - GCP Skills Boost (2026)
CIPP/BR - IAPP (In Progress) | AIGP - IAPP (In Progress)
